Revise the following with your child:

- The universe is incredibly huge.
- The universe is everything we can touch, feel, sense, measure or detect.
- It includes living things, planets, stars, light, and even time.
- The universe contains millions of stars.
- The Sun is our nearest star.
- The Sun provides us with light and heat.
- Without the Sun there would be no light. So our planet would be dark, frozen and lifeless.
- There are eight planets in our solar system.
- They are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.
- The Earth revolves around the Sun.
- Mars is the most Earthlike of all the planets.
- The Moon is Earth’s only natural satellite.
- The moon is airless, waterless and lifeless.
